(If necessary, use the other side of the paper to answer these questions.)

1. What is the structure of your school day? (block scheduling, 45 minute periods, etc.)

2. What in-house math initiatives have been implemented in the last two to three years (school wide or district wide) ?

3. What do you see as the major strengths of the math program in your school?

4. What issues in the area of math do you feel your staff would like to see addressed in the upcoming PLN seminar?
